

**1. Year Groups**  
**Year 2**

**2. Aspect of D&T**  
**Food**  
**Focus**  
**Preparing vegetables**

**4. What could children design, make and evaluate?**  
vegetable salads vegetable soup other – specify

**5. Intended users**  
themselves parents siblings  
grandparents friends peers at school  
younger/older children visitors  
other – specify

**6. Purpose of products**  
picnic celebration party school event  
sports day pleasure café corner  
other – specify

**7. Links to topics and themes**  
Healthy Eating Festivals and Celebrations  
Teddy Bear Picnic Food and Farming  
Ourselves Senses Growing  
other – specify

**8. Possible contexts**  
home school gardens playgrounds  
local community culture industry  
other – specify

**9. Project title**  
Design, make and evaluate a \_\_\_\_\_ (product) for \_\_\_\_\_ (user) for \_\_\_\_\_ (purpose)  
To be completed by the teacher. Use the project title to set the scene for children’s learning prior to activities in 10, 12 and 14.

**16. Possible resources**  
range of fresh fruit and vegetables  
chopping boards, knives, peelers, graters, skewers, juicers, spoons, jugs, plates, bowls, aprons, plastic table covers, hand washing and washing-up facilities  
yogurt making machine or blender, if appropriate

**17. Key vocabulary**  
fruit and vegetable names, names of equipment and utensils  
sensory vocabulary e.g. soft, juicy, crunchy, sweet, sticky, smooth, sharp, crisp, sour, hard  
flesh, skin, seed, pip, core, slicing, peeling, cutting, squeezing, healthy diet, choosing, ingredients, planning, investigating tasting, arranging, popular, design, evaluate, criteria

**3. Key learning in design and technology**

**Prior learning**

- Experience of cutting and slicing soft fruit using appropriate utensils.

**Designing**

- Design appealing products for a particular user based on simple design criteria.
- Use knowledge of their own experience and existing products to generate ideas.
- Describe what their product is for and the suitability for the intended user.
- Communicate these ideas orally and using IT.

**Making**

- Choose and use simple utensils and equipment to e.g. peel, cut, slice, squeeze, grate and chop safely.
- Select from a range of vegetables according to their characteristics e.g. colour, texture and taste to create a chosen product.

**Evaluating**

- Make simple judgements about their product and ideas against design criteria.
- Evaluate ideas and finished products against

**10. Investigative and Evaluative Activities (IEAs)**

- Children examine a range of vegetables. Use questions to develop children’s understanding e.g. *What is this called? Who has eaten this fruit/vegetable before? Where is it grown? When can it be harvested? What are its taste, smell, texture and appearance? What will it look like if we peel it or cut it in half? What are the different parts called?*
- Provide opportunities for children to handle, smell and taste fruit and vegetables in order to describe them through talking and drawing. e.g. *What words can we use to describe the shape, colour, feel, taste?*
- Evaluate existing products to determine what the children like best; provide opportunities for the children to investigate preferences of their intended users/suitability for intended purposes e.g. *What do you prefer and why? What might we want to include in our product to meet our user’s preferences? Which fruit/vegetables might be the best for our product to match the occasion/purpose?*

**12. Focused Tasks (FTs)**

- Discuss basic food hygiene practices when handling food including the importance of following instructions to control risk e.g. *What should we do before we work with food? Why is following instructions important?*
- Demonstrate how to use simple utensils and provide opportunities for the children to practise food-processing skills such as washing, grating, peeling, slicing, squeezing e.g. *Do we eat the whole fruit? Why or why not? Which parts do we eat? What might we have to do before eating this? Why do we cut, grate, peel and slice in this way?* Discuss different effects achieved by different processes.
- Discuss healthy eating advice, including eating more fruit and vegetables; using *The eatwell plate* model talk about the importance of fruit and vegetables in our balanced diet e.g. *Why is it good to eat fruit and vegetables? How many pieces of fruit/vegetables do you eat per day? Why is it important to wash fruit/vegetables before we eat them?*

**11. Related learning in other subjects**

- **Science** – understand that plants have leaves, stems, roots, flowers and fruits; understand the importance of growing plants and how seasons affect growth.
- **Spoken language** – children develop and use a sensory vocabulary.
- **Writing** – develop descriptive writing based on first-hand experience of tasting fruit and vegetables.
- **Mathematics** – carry out a simple survey to find out which are the favourite fruits/vegetables; construct and interpret the information in e.g. pictograms and bar graphs.

**13. Related learning in other subjects**

- **Spoken language** – ask questions to check understanding; use the correct terminology for equipment and food processes.
- **Writing** – instructions on how to use one of the utensils; how to prepare e.g. a fruit for eating.
- **Science** – talk about a balanced diet, different types of food and hygiene.

**15. Related learning in other subjects**

- **Spoken language** – ask questions to develop and check understanding, develop technical and sensory vocabulary and build knowledge.
- **Art and design** – use and develop drawing skills.
- **Writing** – children write a simple account about how they made their food product.
- **Computing** – use digital photographs to help order the main stages of making and support children’s writing.

**18. Key competencies**

problem-solving teamwork negotiation  
consumer awareness organisation motivation  
persuasion leadership perseverance  
other – specify

**19. Health and safety**

Pupils should be taught to work safely and hygienically, using tools, equipment, techniques and ingredients appropriate to the task. Prior to undertaking this project risk assessments should be carried out, including identifying whether there are children who are not permitted to taste or handle any food ingredients or products.

**14. Design, Make and Evaluate Assignment (DMEA)**

- Set a context for designing and making which is authentic and meaningful.
- Discuss with the children the possible products that they might want to design, make and evaluate and who the products will be for. Agree on design criteria that can be used to guide the development and evaluation of children’s products e.g. *Who/what is the product for? What will make our product unique/different? How will we know that we designed and made a successful product?*
- Use talk and drawings when planning for a product; ask the children to develop, model and communicate their ideas e.g. *What will you need? What fruit/vegetable will you need? How much will you need? How will you present the product?*
- Talk to the children about the main stages in making, considering appropriate utensils and food processes they learnt about through IEAs and FTs.
- Evaluate as the children work through the project and the final products against the intended purpose and with the intended user, drawing on the design criteria previously agreed.

**20. Overall potential of project**
